## Johnny's story

At Oak Tree School, there is a Geography lesson. Miss Burton is showing a film about China. But one of the children, Johnny, is dreaming. In his dream, he is sitting on a dragon flying along the Great Wall of China. Johnny is happy. He loves flying. He loves riding the red dragon. Then Miss Burton stops the film and starts asking questions.

'Johnny,' she says, 'When it's three o'clock in the afternoon in London, what's the time in Beijing?'

Johnny says, 'It's my dragon.'

The children laugh. Miss Burton doesn't laugh.

The next lesson is Maths. The children all work in their workbook. Johnny isn't doing any work in his workbook. He loves doing Maths puzzles in his head. Then Miss Burton starts asking questions.

'What is fourteen plus twelve?' she asks Jenny.

'Twenty-six,' Jenny answers.

'Johnny,' Miss Burton asks, 'What is forty plus eighteen?'

'I think the number two is at the top of the triangle,'

Johnny says.

The children laugh. Miss Burton doesn't.

The next day the children have Science. Miss Burton tells the children about the lifecycle of butterflies. Johnny is dreaming. In his dream, he is in Art class. He has to paint a butterfly on a T-shirt.

Miss Burton stops talking and starts asking questions.

'What do caterpillars eat?' she asks Johnny.

'T-shirts,' Johnny says.

The children laugh. Miss Burton doesn't.

The next day the children have Music. Miss Burton plays some music – a piano concert. Johnny is dreaming. Johnny is on stage. He is singing and playing the guitar. There are hundreds of people watching. When he stops, the people clap their hands and shout.

The music stops and Miss Burton starts asking questions about it.

'What music is this?' she says to Johnny.

'Come on, come on, it's time to dance,' Johnny starts singing.

The children laugh. Miss Burton doesn't.

Two weeks later, the children have to write a story for a competition.

'Who can write the best story?' Miss Burton says.

Johnny writes a fantastic story. It's about dragons and butterflies, a guitar concert, puzzles and other wonderful things. Johnny wins first prize.

The children don't laugh; they clap and shout, 'Hurray Johnny!' Miss Burton smiles. 'It's a beautiful story. Read it to us!'

### 3 Think! Put the story in order.

- 4 Johnny does a Maths puzzle in his head.
- 5 Miss Burton teaches Science.
- 6 Johnny dreams of painting a butterfly on a T-shirt.
- 1 Miss Burton shows a film.
- 8 Johnny wins the competition.
- 7 Miss Burton teaches Music.
- 8 Johnny dreams of playing the guitar.
- 3 Miss Burton teaches Maths.
- 2 Johnny dreams of flying on a dragon.

**Lucy:** Can you help us? A snake bit our dog.  
**Ben:** He's very ill. Have you got any medicine?  
**Woman:** No, but go to the old man in the hut next to the big tree. He can help you.

**Man:** Take your dog to the top of the mountain. There's a waterfall there. Above it, there's a tree with a golden apple. Your dog has to eat that apple.

**Horax:** Quick. I want to get to that apple first. We don't want Buster to get better!  
**Lucy:** Look Ben, there are Horax and Zelda.

**Lucy:** Look at the tree. It's Horax and Zelda.  
**Ben:** Hey, Horax. Stop!  
**Zelda:** Do you want any help, Horax?  
**Horax:** No. I think I've got it.

**Zelda:** Horax, you fool!  
**Ben:** Thanks for the apple, Horax!

Ben: Lucy, look. There's a letter.  
 Lucy: It's an *I*, Ben. It's our first letter.

# Food chains and habitats

- 1 Read, look and draw lines.  
What do these animals eat?

We all need energy to grow, run, jump and play. We get our energy from the food we eat. That's why we often feel weak and tired when we are hungry. Animals also get their energy from food. Different animals eat very different things.

- 2 **Think!** Read and draw arrows to make food chains.

A food chain shows us what animals eat. All food chains start with the sun and plants. Plants use the sun to grow. Some animals eat plants to get energy. Some animals eat other animals to get energy.

Grass gets energy from the sun, rabbits eat grass and foxes eat rabbits. This is an example of a food chain.

## Arnold and the robot

William is a scientist. He makes robots to help people with their housework. His robots can wash dishes, they can cook, they can tidy rooms and they can sweep floors. Arnold is William's helper. He has to keep William's laboratory clean and tidy.

William sometimes teaches Arnold how to build a robot, but Arnold never listens. So he doesn't know much about robots. Arnold doesn't like his job very much because he doesn't like difficult work.

One day William goes into town to buy some things. 'When I come back at half past three,' he says to Arnold, 'I want to see this room clean. I want you to tidy the table. I want you to sweep the floor and I want you to wash the floor. Goodbye and work hard!'

Arnold tidies the table. Then he sweeps the floor and thinks, 'Now I have to wash the floor.'

He gets a bucket and fills it with water and then he has an idea.

'I want a robot to help me.'

He presses a button and says, 'Robot wash the floor.'

The robot takes the bucket and throws the water over the floor. Then it picks up the bucket, fills it with water and throws the water over the floor again.

'Stop,' shouts Arnold, but the robot doesn't

stop. Arnold presses another button. But now the robot works really fast, filling the bucket and pouring the water. The laboratory is full of water. Arnold doesn't know what to do.

Just then, the door opens.

It's William. He looks at the water. He is very angry.

He goes over to the robot and presses some buttons. The robot stops still.

'Now clean up,' William says to Arnold. 'You've got all night.'

Arnold starts working. It takes him a long time.

'Next time William teaches me I am going to listen carefully,' he thinks.

### 3 Think! Put the story in order.

- Arnold gives the robot a bucket of water.
- William goes into town.
- The robot throws water over the floor.
- Arnold tidies the table.
- Arnold shouts, 'Stop.'
- Arnold sweeps the floor.
- William arrives home.
- Arnold has an idea.

# Saving Water

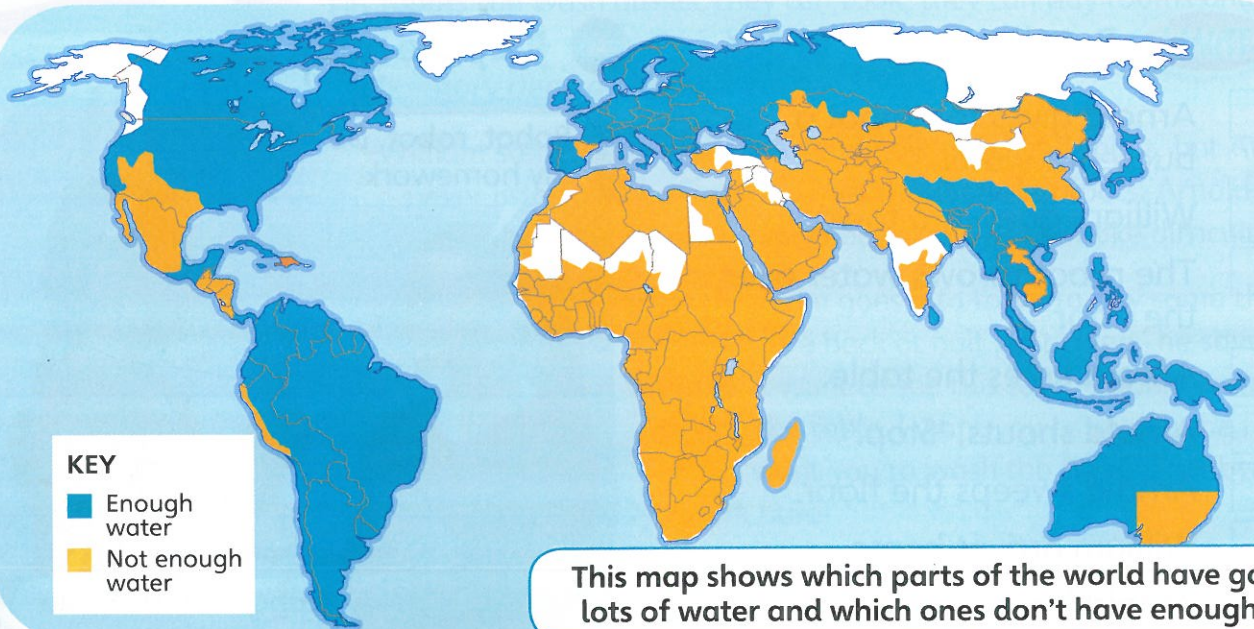

1 <sup>CD2</sup><sub>07</sub> Listen, read and circle.

Water covers a lot of the Earth, but less and less of this water is OK to drink because it is dirty. Every year, there are more people on the Earth who need water. Many places do not have much water because it doesn't rain very often. This means we have to save water.

But many people aren't using less water, they are using more. Often, people *waste* water. This means that they use water when they don't have to. We have to try to save water, not waste it.

- 1 Every year there are **more** / **less** people in the world.
- 2 Every year we use **more** / **less** water.

1 **Think!** Are you a water waster? Do the questionnaire.

**How often do you ...**

1 turn the tap off while you brush your teeth?

- always
- sometimes
- never

2 have a shower and not a bath?

- always

3 use a bucket of water to wash your bike and not a hose-pipe?

- always
- sometimes

4 turn the tap off carefully so that it doesn't drip?

- always

always = 2 points

sometimes = 1 point

never = 0 points

8-6

Well done! You're very good at saving water.

5-4

You're trying, but you can do better.

3-0

Not so good. Time to start saving water!

2 **Project Think!** How much water does a dripping tap waste?

1 Put a cup under a dripping tap. Wait for ten minutes.

3 How much water does the tap waste every: **a** hour? **b** day?

2 Measure how much water there is in the cup.

4 What could you use the wasted water for?

pointer

You can use a compass to find your way. Compasses have a pointer that always points north. Compasses are very important instruments for explorers and map makers to help them find where they are going. But we now use compasses less often than before. This is because there is a new gadget called a GPS. A GPS works by satellite and helps people to find their way. Lots of people in cars use GPS systems.

## What Christine found

Christine lives on a small farm on an island near Ireland. Her best friend is Ryan. Ryan's dad has a big farm next to Christine's parents' farm. One evening in July there is a big storm.

Early next morning Ryan knocks on Christine's door.

'Get up, Christine,' he shouts. 'Let's go treasure hunting on the beach.'

Christine gets up quickly and they go to the beach to look for shells and other beautiful things.

Suddenly Christine shouts,

'Look there's something in that net over there.'

Ryan runs over and they find a small bird in the net.

The bird is black and white, with orange legs and it has an orange and black bill.

'What sort of bird is that?' says Ryan.

'I don't know,' Christine answers.

They run back to Christine's farm and show the beautiful bird to Christine's dad.

'It's a young puffin,' he tells them. 'Puffins hunt for fish in the water. They can fly and they are very good at swimming. There were lots of puffins on the island, but now there aren't many.'

puffin. It gets bigger and bigger. One morning at the end of the summer there is no puffin in the box.

'Where is it?' Christine asks her mum.

'I'm sure the puffin is with his friends out in the sea.'

'Will it come back next year?' asks Christine.

'I don't know,' her mum says.

It's a year later. Christine is looking for shells on the beach again. Suddenly, she can hear Ryan.

'Come quickly,' he is shouting.

Christine runs along the beach and then she sees them. There are three puffins on the cliff near their farm. Christine is sure that one of them is their puffin. She is very happy.

'Why not?' Christine asks.

'There aren't many fish any more,' says her dad. The children get a box and put some grass in it and then put the small puffin in it. Christine's mum gives the children some fish and they feed the puffin.

In July and August, Ryan comes over to Christine's house every morning and every evening to feed the

Three children in our class were at the park on Saturday afternoon.

- 1 Find information about a sea creature and make notes.

Animal: turtle

- Where do they live? in water (salt water and fresh water)
- What do they look like? brown, green, yellow, grey, four legs, hard shell
- How do they have their young? lay eggs in the sand on the beach, then go away, babies open egg, start to swim
- How long do they live? 40–70 years, but the oldest turtle is about 175-years-old!
- Other interesting facts: turtles have very good eyes, and they haven't got ears.

- 2 Find pictures and write about your sea creature.

I like turtles. They are beautiful. They are green, yellow, grey and brown. They live in the sea, rivers or lakes. They eat plants and small animals. Turtles lay eggs on beaches. # Numbers

### 1 CD3 08 Listen, read and answer.

Imagine a world with no numbers. No counting, no money, no Maths! Numbers are very important and they are also very old.

The numbers we use today are called Hindu-Arabic numbers. Imagine it's the 12th century. Leonardo Pisano Fibonacci, an Italian professor of Maths, travels to North Africa. He sees the numbers they use there. They are much easier to use than the numbers in Italy. When he goes back to Europe, he shows people the numbers from North Africa. People soon use them all over the world.

- 1 What things do we need numbers for? We need numbers for ...
- 2 Where do the numbers we use today come from?

### 2 Read and write the numbers.

Before Hindu-Arabic numbers, the numbers in Europe were called Roman Numerals. You can still see Roman Numerals today. Roman Numerals are letters. Do you know any Roman Numerals?

Here are some examples:

I = 1    V = 5    X = 10

You combine these letters to make other numbers. For example:

VI = 6 [V+I]

XVIII = 18 [X+V+I+I+I]

But when you put the smaller numbers on the left, you subtract to make the number.

IV = 4 [V - I]

IX = 9 [X - I]

- 1 What are these Roman Numerals?  
III \_\_\_\_\_  
XVI \_\_\_\_\_  
XXII \_\_\_\_\_
- 2 Write the Roman Numerals for:  
8 \_\_\_\_\_  
25 \_\_\_\_\_  
33 \_\_\_\_\_

- 1 Read and solve the puzzle. What are the next two numbers in the Fibonacci Sequence?

Leonardo Pisano Fibonacci also invented a very simple sequence of numbers called the Fibonacci Sequence. Here it is:

To make each number in the series you just add the two numbers that come before it.

## Sophia saves the day

The score was 5–5. Suddenly Sophia was in front of the goalkeeper. She kicked the ball very hard.

'Goal! Great! Super, Sophia!' her friends shouted. Sophia was the best player in her team. Sophia's friends were very happy. Sophia was happy too. But there was a problem. She had a pain in her leg.

The next morning Sophia went to hospital with her dad. The doctor was very friendly. She looked at the leg.

'Hmm!' she said. Then she checked Sophia's knee.

'Ouch!' Sophia shouted.

'We have to X-ray your knee,' said the doctor.

'I want to play football with my friends tomorrow,' Sophia said.

Again, the doctor said 'Hmm!' Then she went out of the room.

A nurse helped Sophia onto the X-ray machine. Sophia was a little scared, but the X-ray only took two minutes.

'Can we go home now, Dad?' Sophia asked.

'I'm not sure,' her dad answered. Then the doctor came back into the room. She looked at a computer screen for a long time.

'You can't go home,' she said. 'There's a problem with your knee. You have to stay in hospital for two weeks.'

Sophia was very unhappy. The first two days in hospital were so boring. Then on day three, the doctor came to see her. She gave Sophia a pair of binoculars. They were fantastic. Sophia watched the people in the streets and the boats on the river. And she watched her friends playing football in front of the school!

She was very happy. But what was that? Suddenly Sophia saw something in the wood behind the school. She was very worried and got her mobile phone.

That evening, Sophia's hospital room was full of people. They took photos of Sophia and they interviewed her for TV.

The next morning the doctor came and gave Sophia a newspaper. On the first page there was a photo of Sophia and in big letters it said,

a virus

Our body likes to be at a temperature of about 37°C. That's the perfect temperature to make us feel good. But sometimes a virus gets into our body. This makes us sick.

Our body wants to kill the virus so it gets hotter. A small fever starts at about 38°C and a fever above 41°C is dangerous. The high temperature also lets us know that there is something wrong and we can do something to help us get better. When we get better, our body goes back to 37°C again.

**1** Read about what you can do if you have a fever.

If the temperature is below 39°C, you can stay at home and make sure you:

- 1 Get plenty of rest. This helps your body to fight the germs that are making you sick.
- 2 Drink a lot of water. Fevers can make you dehydrated (that means there's not enough water in your body).
- 3 Wear cool pyjamas and use a blanket that isn't too hot.

**2** Look and tell the girl what *not* to do.

Don't ...

**3** **Project** Make a thermometer.

- 1** Fill a bottle  $\frac{1}{2}$  full with  $\frac{1}{4}$  water and  $\frac{1}{4}$  alcohol.

- 2** Add some red food colouring.

- 3** Push a straw through the clay and use the clay to close the top of the bottle. There should be no holes in the clay. Push the straw until it is about 1 cm from the bottom.

- 4** Mark the height of the liquid in the straw at room temperature. What happens if you put your bottle in the fridge?

# Write a story

- 1 Think of a story. It can be a true story or a story you imagine. Use the questions to help you with the story.

Who is the story about?	Tom, 12-years-old, good swimmer
What happened?	swimming, jumped into pool, problem, not a lot of water, hurt his head, hospital, 3 weeks
When?	2 weeks ago, Sunday
What was the weather like?	very sunny, hot,

- 2 Plan and write your story. Draw pictures.

 Tom - great swimmer.	Sunday, two weeks ago - sunny and very hot. 	Tom jumped into the pool. 
 Not a lot of water.	Tom hurt his head. 	Tom was in hospital for 3 weeks. 

- 3 Draw and write your story in your scrapbook.

Tom loved swimming. He was very good at it.

One Sunday, it was very hot and Tom wanted to swim. He jumped into the pool, but there was not much water in it.

The pictures in Activity 1 are examples of Origami. Origami is a Japanese word. 'Ori' means to fold and 'kami' means paper. And that's what Origami is – the art of folding paper to make beautiful models.

Japanese Origami started in the sixth century when monks from China took paper to Japan. Paper was very expensive and Origami was very

special. For many years there were no books about Origami. People in Japan learned how to do it when they watched other people.

In 1954, Origami started to become popular all over the world. A Japanese man called Akira Yoshizawa drew pictures to show how to fold Origami models. People all over the world started to make their own models.

## Holidays with Grandma

'I don't want to go to Grandma's,' shouted Sean. 'You're going to see all those animals in Africa and I'm going to spend my holidays on a farm. It's not fair.'

'Mum is going to work in a hospital and I'm going to work for an architect,' Dad said. 'We can't take you to Africa with us. I'm sure you're going to have fun with Grandma.'

They drove to Grandma's farm. After dinner, Sean's parents said goodbye to Grandma and Sean and went home. That night Sean wrote a text message to his parents. It read: There's no television in the house ☹ and there are no children on the farm.

A few days later, Sean wrote another text message: It's so boring here. ☹

One day after breakfast, Grandma said,

'Come with me, Sean. Let's look at my horse and the pony.'

Sean went to the stable with his grandma and watched her feed the horse and the pony. Then he watched Grandma brush their coats.

'I'm going for a ride,' said Grandma. 'Would you like to come along?'

'I can't ride,' said Sean.

'Come on,' said Grandma, 'I can teach you.'

So they rode slowly for half an hour. The next day they rode for an hour and then they went out even longer. Sean soon loved riding. Every day, first thing in the morning and before dinner, he fed the horses and brushed their coats. He forgot that there was no television and he didn't write any text messages.

After a month, his parents came back from Africa. They went to pick up Sean. When they got to the farm, Sean was not there. He was riding his pony. He was not bored at all. When he got back his parents hugged him and said,

'Time to say goodbye to Grandma.'

Sean looked sad.

'But school only starts in three weeks!' he said.

'Grandma, can I please stay with you until school starts?'

His parents and Grandma laughed.

'Of course you can,' said Grandma. 'The pony and I are happy to have you here.'

Many countries in the Northern and Southern hemispheres have four seasons: spring, summer, autumn and winter; but they have their seasons at different times. For example, December in Japan is in winter, but in New Zealand it's in summer.

Countries near the Equator like Malaysia do not have spring, summer, autumn or winter. They usually have wet seasons when it rains a lot and dry seasons when it doesn't rain very much.

The wet seasons are from December to March, and the dry seasons are from June to September.
