Lesson One Story

1 Listen and read. Where does Tom come from?

Libby Hi, Kate! Hi, Ed! Did you have a good vacation in Florida?

Kate Yes, thanks! How was your vacation?

Libby It was great! We went to Mexico.

Fin Welcome back to the DSD Club, everyone! This is Tom. Tom is my cousin, and Libby's of course!

Tom Hi, everyone!

Fin Tom's from Canada, but his family lives here now.

Libby Tom, come and meet my other cousins!

Ed Hi, Tom! I'm Ed. This is my sister, Kate. Shall we show you the club?

Tom Great! Thanks!

Kate We do lots of things at the DSD Club. Last year, we did a play, but Fin's car broke down and he had the costumes!

Libby So, we had to wear these!

Ed This was our time capsule. We put in a magazine, a CD, a map of the town, and lots more things.

Libby And this is the time we cleaned up the river! It was really dirty!

Tom You have a lot of fun at the DSD Club!

Ed Yes, we do. It's really good.

Ed This is a good story!

Kate Yes! We learned first aid at the club. We were walking home afterwards when a man fell off his bike and we helped him.

Ed He was Jim Fisher - the best basketball player in town!

Libby He invited us to the game because we helped him!

Tom Lucky you! I love sports! I play ice hockey in Canada.

Fin What do you think of the Do Something Different Club, Tom?

Tom I think it's great! Can I join?

Fin Yes, of course! Here's your DSD T-shirt and cap!

Island Adventure

Max was staying with his cousin Ryan by the sea. Every day, the boys went to the beach and played volleyball or went fishing. But one day, they stood on the sand and stared across the sea at a small island in the distance.

"I'd like to explore that island," said Max.
"Let's borrow my brother's boat and go there," said Ryan.
"We'll be back before he finds out!"

The boys rowed to the island and left the boat on the sand. They climbed trees, swam in the river and found some caves. At last, they decided to go home, but when they went back to the boat, it wasn't there!

"What are we going to do?" asked Max. "Nobody knows we're here!"
"Let's make a fire," said Ryan. "Someone will see the smoke."

"How?" asked Max.
"We can hit two rocks together to make a fire. Come on!"
But it was dark before the boys had a fire. Suddenly, there was a splash of water. The boys stared across the sea. A dark shape was coming towards them.

"Run!" shouted Max.
"Hey!" said a voice. "Don't you want to go home?"
Ryan's brother was standing on the beach next to the missing boat.

"How did you find us?" asked Ryan in amazement.
"I saw the boat floating near the shore, so I swam out to get it. Then I saw your smoke."

"That was lucky," said Ryan.
"Yes," said Ryan's brother, as they rowed back, "but next time tell me before you take my boat out and always tie it to a tree!"

Writing

- Look at the story. What is it about?
- Read.

A story

There are lots of things to remember when we write a story.

We can start a new line when someone new speaks.

We use adverbs to describe how people say things and how people feel.

When we know who's speaking, we don't have to put their name.

We put the speech and the punctuation inside the quotation marks.

A Stormy Day at Sea

Harry was on a boat trip with his dad. It was cloudy, but it wasn't raining, so they sailed far out from the shore. When they stopped and took out their fishing nets, the sky suddenly went dark.

"I think there's going to be a storm," said Harry's dad.

"Should we go back?" said

Harry nervously.

"It's too late!"

Harry felt the first drops of rain.

Lightning flashed and there was the sound of thunder. Waves splashed over them and the boat rocked from side to side.

"Hold on!" shouted Harry's dad above the sound of the wind. The storm lasted an hour, but at last, the weather changed and the sea was calm.

Harry got out his net again. He was cold and wet but he was excited, too. He felt like a real fisherman.

- Read again and answer the questions.

- How long does the storm last?
- How does Harry feel after the storm has finished?

- Write this dialogue correctly.

It's a beautiful day! said Mandy. Do you want to go to the park? asked Olivia. I can't! said Mandy. Why not? asked Olivia. I have to clean up my room, said Mandy sadly. I'll help you! said Olivia. Oh thank you! said Mandy happily.

"It's a beautiful day!" said Mandy.

Reading

1 Look at the article. Choose the correct title.

- a Working with animals b The life of a free-diver c The dangers of the ocean

2 Listen and read. 

William Trubridge

William Trubridge was born in the U.K., but when he was eighteen months old his family sold their house and bought a boat. They went on a long trip, finally arriving in New Zealand when William was five years old. During those days William spent a lot of time in the water, swimming and **snorkeling**. He was also very good at **diving** deep down into the ocean and, by the age of eight, it was obvious there was a sport he could do.

The sport was called free-diving. Thousands of years ago, people dived deep into the oceans to catch fish and to look for **pearls**. But they didn't have any diving **equipment** to help them breathe. Today, this kind of diving has become a popular sport. People dive as deep as possible with no breathing equipment. They stay under the water for as long as they can and try to break world records. They train hard, but the **freedom** they feel when they're free-diving makes it worth all the hard work.

Although William was very **talented** at free-diving, he didn't begin serious training until 2003. Then, he went to Italy and trained with the Italian Apnea Academy. In 2007, William broke his first world record when he dived 81 meters down into the ocean. Then, in 2010, at Dean's Blue Hole in the Bahamas, he swam down 100 meters and then back up to the surface. It took him four minutes and ten seconds. It was the deepest known dive without equipment that a human had ever done.

Today, William spends most of his time in the Bahamas where he trains and teaches free-diving at Dean's Blue Hole. He is also interested in looking after the **environment** and protecting **wildlife**. He has worked hard to tell the world about Hector's dolphin, which is seriously endangered. William also feels strongly about the number of plastic bottles floating in the oceans; he wants people to look after our oceans better.

FIGHT OR FLIGHT

Have you ever wondered why your body reacts when you're afraid? Perhaps your heart beats faster when you see a spider, or your mouth goes dry when your teacher says you have a test. Maybe your palms sweat when you see the school bully. The body's reaction to fear is called the *fight or flight* response.

Imagine you're living thousands of years ago. You're walking in the forest and you see a wild animal. You have two choices. You can either pick up a weapon – that's *fight*, or you can run away – that's *flight*. When you are in this situation, your body automatically prepares itself for action:

- 1 Your heart rate increases to pump more blood to your muscles and brain.
- 2 Your lungs take in air faster to supply your body with oxygen.
- 3 The pupils in your eyes get larger so that you can see more easily.
- 4 Your digestive system slows down so you can concentrate on more important things.

The *fight or flight* response is an early warning system that can help you in dangerous situations. For example, when you're crossing the road and a car suddenly appears, *fight or flight* helps you see the danger and get to safety. However, although *fight or flight* is a natural response, it isn't your only choice. Try facing your fears and your phobias. Pick up that spider, or tell the bully to leave you alone.

Top Food Festivals

Going to festivals is always fun, but going to festivals that have delicious food is even better! Here are some of our favorite festivals around the world.

- 1 If you like food, you'll love the Kimchi Festival. This festival takes place in October every year in Gwangju in Korea. It lasts for five days but what does it celebrate? Kimchi, of course! Kimchi is a traditional dish made with onions, garlic, peppers, and other vegetables. It is very spicy, but it can be sweet, too. It is also very good for you! At the festival, visitors can taste different kinds of kimchi. There are also kimchi-making competitions.
- 2 The Gilroy Garlic Festival is one of the largest food festivals in the U.S.A. The festival takes place every year in Gilroy, California. It happens on the last weekend in July and it's one of the best garlic festivals in the world. So what do people do during the festival? Well, they eat lots of things made with garlic including garlic ice cream and garlic fries. There are also garlic cooking demonstrations, music, and dancing.
- 3 People celebrate the Moon Festival in different parts of Asia including China. The festival takes place every year in September or October. It lasts for three days and people celebrate the end of the summer harvest. So, what do people eat? The traditional food is moon cakes. These are round, sweet cakes and they are very popular. The cakes have different fillings. You can have ice cream, chocolate, or traditional red-bean paste. People also carry lanterns at the festival and watch traditional dancing.

Writing

1 Look at Danny's letter. What type of letter is it?

- a) a thank you letter b) an invitation c) a letter of complaint

2 Read.

We start a letter with "Dear" and the person's name.

First we say why we are writing. For example, if we are writing a thank you letter, we write what we are thanking them for.

If we include something with the letter, like a photo or present, we write why we've sent it.

We finish a letter with "Best wishes" or "From."

Dear Joe

Thank you so much for inviting me to the Gilroy Garlic Festival. It was so interesting to see all the different food. My favorite part of the festival was the cooking demonstration when we learned how to make garlic ice cream! I made it for my mom and dad when I came back to Hong Kong. I also loved the garlic fries. They were delicious!

I really enjoyed being in California. It was great to stay in that amazing, big, new hotel. I would love to visit you in the U.S.A. again and see some more places.

I have sent you a picture I took at the garlic festival so we always remember it!

Best wishes,

- Who painted the portrait of Dorian?
- What did Dorian wish for?
- Where did he keep the portrait?
- How did the portrait look after Dorian died?

Many years ago, there lived a young man called Dorian Gray. He was a handsome and pleasant young man, and he was always very kind to people. Dorian Gray loved art and beautiful things, and he wanted a picture of himself. So, one day, he visited a friend of his, called Basil Hallward. Basil was a talented artist and Dorian asked him to paint his portrait. Basil agreed and, every day, Dorian went to his art studio and sat while Basil painted him.

One day, when Dorian was at the studio, he met one of Basil's friends. The friend's name was Henry Wotton. While Basil painted, Henry talked to Dorian. He told him about beauty and youth. He said that these qualities were the most important things in the world. He said that they were more important than kindness, intelligence, gentleness, and patience. Dorian listened very carefully and, soon, he started to believe that this was true.

At last, the portrait was finished. It was a wonderful painting and one of Basil's best works of art. Dorian stared at the picture for a long time. At first, he felt very happy. He saw a handsome young man with a kind and intelligent face. But, after a while, Dorian started to feel sad. He remembered Henry's words and he knew that, one day, he wouldn't be handsome and he wouldn't be young. One day, he would be old and gray.

"I wish," said Dorian suddenly, "I wish that I could always stay young and that the picture would get old."

Henry laughed when he heard this, but Basil was very angry.

"Don't talk like that," said Basil. "That's a terrible thing to say. Many things are more important than youth and beauty."

Dorian didn't believe Basil. He just felt sad because he was going to be old one day.

Dorian took his portrait home, but now his life was different. He didn't see Basil for a long time. He met Henry and his friends instead. They talked and went out to theaters and to

restaurants. Slowly, Dorian started to change. He became hard and cruel. He didn't think about other people's feelings. He only thought about himself.

One day, he looked at his portrait and thought there was something different about it. What was it? He looked more closely. The face had changed. The mouth looked unkind. It was strange. Dorian picked up a mirror and looked at his own face. Then he looked back at the portrait. It was true. The portrait was different.

Suddenly, Dorian remembered that he had wished to stay young while the picture grew old. It seemed impossible, but his wish had come true. Dorian covered the picture. He didn't want to think about this terrible thing.

One day, Basil visited him at home. They talked for a while and then Basil said, "I want to borrow your portrait. I want to put it in an exhibition in an art gallery."

Dorian thought about the painting and how it had changed.

"I'm sorry, Basil," Dorian said quickly and quietly. "But I can't give it to you."

Basil looked at him strangely.

"You've changed, Dorian. You used to be a kind man. Now you are cold and selfish."

When Basil had gone, Dorian took the portrait and put it in a small room. He locked the door and put the key in his pocket.

"No one can ever see this portrait," he said to himself.

And so the years passed, and Dorian still looked young and handsome. He enjoyed his life, but he didn't care about anyone but himself. Behind the locked door of the little room, the picture of Dorian Gray grew older and uglier. The face showed the truth about Dorian's bad life. Sometimes, Dorian went and looked at the picture, and he thought how terrible he had become. He hated the picture and he hated his life.

At last, Dorian decided to be good again. He thought that, if he was good, the picture would change back again. But it was too late for Dorian Gray to change. He died and, when he died, he became old and ugly, and his portrait suddenly changed back to look as handsome and young as it was at the beginning.

1 Listen and read. Why can't the planes fly? 🎧

News just in! There is a group of lions lying on the runway at a small airport in South Africa. Planes can't leave because the lions are in the way! The lions have been lying there since 9:00 a.m., but no one wants to move them! Passengers have been waiting for five hours! The manager of the airport says that it is too dangerous to move the lions. He thinks they are enjoying the sun and will move when the sun goes down. Until then, everyone must wait!

2 Read and learn.

Present perfect progressive

We use the **present perfect progressive** with **for** and **since** to talk about something that started in the past and is still happening.

Passengers have been waiting for five hours.

The lions have been lying there since 9:00 a.m.

Present perfect progressive = have / has + been + ing form

We use these time expressions with the **present perfect progressive**, too:

all morning, all day, all week

We've been doing our homework *all morning*.

3 Complete the sentences. Use the present perfect progressive.

- Mom has been cutting (cut) onions for the past ten minutes.
- Jenny has cleaned (clean) her room all morning. It looks much better now.
- Jon has done (do) his homework all evening.
- They have been swimming (swim) since twelve o'clock.
- Tim has been running (run) for an hour now. He's training for the race.
- We have nearly finished watching (watch) the movie since eight o'clock. It's nearly finished.

4 Write sentences. Use the present perfect progressive.

make a cake / all morning

She's been making a cake all morning.

play the piano / all afternoon

She's been playing the piano all afternoon.

play tennis / since one o'clock

She's been playing tennis since one o'clock.

sleep / since 12:00 p.m.

She's been sleeping since 12:00 p.m.

run / for two hours

She's been running for two hours.

talk on the phone / for three hours

She's been talking on the phone for three hours.

1 Listen and read. What has Professor invented? 🎧

PROFESSOR CHIP

2 Read and learn.

Present perfect progressive

We use the **present perfect progressive** to talk about something that started in the past and has recently stopped. There may be evidence for the activity.

I'm tired because I've been working on a new invention.

I'm wet because your special car has been spraying water at me!

What have you been doing?

Have you been swimming?

Yes, I have.

No, I haven't.

3 Complete the sentences. Use the present perfect progressive.

- Max is tired because he has been playing (play) tennis.
- The boys are cold because they have been swimming (swim) in the pool.
- The children aren't hungry because they have been eating (eat) chocolate.
- I'm wet because I have been cleaning (clean) my dad's car.
- We're dirty because we have been working (work) hard in the garden.
- Ella's happy because she has made (make) cakes.

4 Speaking Talk about the pictures.

play / tennis ride / his bike
do / homework run / a race
make / a cake play / soccer

He's been riding his bike.

It's Ben.

Reading

- Look at the pictures and the text. What are the three types of transportation?
- Listen and read. 

Transportation Around the World

The environment is different all around the world. Some people live in places where there is lots of snow, some people live in deserts and some people live near the water. People around the world have developed different kinds of transportation to help them travel around the environment they live in.

In desert areas, camels have traditionally been used as a form of transportation. They are **ideal** for traveling across the desert because they can survive for a week or more without water. Also, their ears and noses can shut tightly to stop sand going into them. They are known as "the ships of the desert" because of their ability to carry heavy **loads** for long distances. There isn't any other animal that could survive so long in the desert, carrying heavy things.

The city of Venice was built on a group of 118 islands. There are about 400 bridges which **connect** the islands. The only way to get around is on foot or on the water. There are no cars or trucks. The gondola is a traditional row boat and for centuries gondolas were the main form of transportation. Today, they are still popular with tourists but most **local** people travel by water buses or **private** boats.

Large areas in Asia have thick forests that are difficult to explore on foot. For thousands of years, humans have used elephants to help them go into these places. Elephants walk on their toes which means they can keep their **balance** even on wet **mud**. They are strong, so they can clear a path through plants and bushes. Today, people still use elephants to transport logs in areas where it's difficult for trucks to go.

3 Read again and correct the words in bold.

- People used **horses** to travel across the desert. *People used camels to travel across the desert.*
- Camels can survive for a **year** without water.
- You can explore Venice **by car** and on the water.
- Local people in Venice travel by water buses or **by private gondolas**.
- Elephants help people in Asia farm and clear land in the **mountains**.
- People also use elephants to transport **machines**.

Words in context

- Find the words in the text to match the pictures and definitions.

verb to join two places so that you can go from one to the other

adj not for everyone to use

adj the best possible thing

adj they live in the place you are talking about

1 connect

2 _____

3 _____

4 _____

8 _____

Listening

- Listen. What does Mr. Jones do? 
- Listen again and write **True** or **False**.

- Mr. Jones has been flying helicopters since he was 18.
- He sometimes takes people to the hospital.
- He dislikes working with famous people.
- He took an African prince to his house.
- He hates being so high in the sky.
- Some of his work starts very early.

False

Speaking

- Ask and answer. Use the prompts or your own answers.

Which form of transportation would you like to travel on?

I'd like to travel on / in

a camel / a gondola / an elephant / a helicopter / a hot-air balloon

Why?

Because it would be

fun / amazing / exciting / fast / interesting

How do you normally travel to school?

I normally travel

on foot / by car / by bus / by train / by bike

What other forms of transportation have you traveled on?

I've traveled on a

boat / ship / plane / train / bike / horse / motorcycle

Writing

- Look at the diagram and text. What type of transportation is it?
- Read.

Hot-air Balloons

People have been flying hot-air balloons for over 200 years. But how do they work?

Step 1: To move the balloon up, the pilot releases gas. The burner heats it. Hot gas moves up, so the balloon lifts off the ground. The more gas that is released, the higher the balloon goes.

Step 2: To move the balloon down, the pilot pulls a rope. The rope opens the envelope and hot gas goes out of the balloon. When there is less hot gas in the balloon, the balloon moves down.

Step 3: The pilot can't turn the balloon. The balloon goes in the same direction as the wind. However, the wind blows in different directions at different heights. If the pilot wants to move one way, he can go up or down until he finds a wind blowing in that direction.

A process diagram

We can use process diagrams to show how something complicated works.

Write an introduction to explain what the subject is.

Draw a diagram to show something that is explained in the text. Use different diagrams to explain different things.

Write labels on the diagram to show what things are called.

Use *however* to give information that contrasts with what you've already written.

Use *so* to give the result of what you've already written.

1 Complete the quiz.

1 Listen and read. Where does chewing gum come from?  44

In ancient times, people chewed gum from trees, but the gum had little flavor. In the 1860s, gum from the *chicle* tree was sent to America from Mexico. At first, it was used as rubber. Then, in the 1880s, it was made into chewing gum by the Fleeer brothers. It was covered with sugar and named *chiclets*.

The gum wasn't advertised so people didn't know about it. In the mid-1880s, factories were opened. Then chewing gum became popular. Today, many chewing gum flavors are made. However, chewing gum isn't always made from trees. Some companies use artificial substances instead.

2 Read and learn.

The passive (simple present and simple past)

Use the **passive** when you don't know the subject of a sentence (who does an action). Many chewing gum flavors **are made**.

Or when the object of a sentence is more important than the subject.

Factories **were opened** by companies.

Negative sentences:

The gum **wasn't** advertised.
Chewing gum **isn't** made from trees.

Simple present passive = **is / are (not) + past participle**

Simple past passive = **was / were (not) + past participle**

3 Complete the sentences. Use the present passive.  Irregular verb list Workbook 6 page 136

- Tea **isn't grown** (not grow) in England.
- Magazines **isn't sold** (not sell) here.
- Jeans **are worn** (wear) by a lot of people.
- Thousands of emails **are sent** (send) every day.
- A lot of pizza **is eaten** (eat) in the U.S.A.
- These T-shirts **are made** (not make) in China.

4 Write sentences. Use the past passive.

- the first chocolate bar / not eat / in Europe
The first chocolate bar **wasn't eaten** in Europe.
- television / invent / in the 20th century
- our school / not build / this year
- the first video games / make / in the 1970s
- popstars / create / in the U.S.A.
- the boy / drive / to the hospital

1 Listen and read. Why can't Chip work?  47PROFESSOR & CHIP 

Why aren't you inventing anything today, Professor?

My computer is being repaired and my lab is being painted. I don't have anywhere to work. What's happening in the kitchen?

Well, the kitchen floor is dirty. But the floor isn't being cleaned because your mechanical mop isn't working. Can you fix it?

Hmm, I'll have a look.

Oh no! My popcorn is being eaten!

2 Read and learn.

The passive (present progressive)

Use the **passive with the present progressive**.

My computer **is being repaired**.
The floor **isn't being cleaned**.

Present progressive passive =
is / are (not) + being + past participle

3 Read and circle.

- My jeans **are washing** / are being washed right now.

Reading

- 1 Look at the text. Find the names of four types of pens.
- 2 Listen and read. 

THE HISTORY OF THE PEN

The Prehistoric World

People used stones to draw pictures in caves. They also used sharp objects or bones to make marks on clay.

The Ancient World

Ancient people developed writing systems. They needed something better to write with. The Egyptians invented the first paper. It was called papyrus. It was made from plants called reeds.

In China, people used brushes made from animal hair to write with. In other places, pens were made from reeds. One end of the hollow reed was cut into a point, or a rib. The pen was filled with writing liquid.

People used liquid from plants to write with. Then the Chinese invented black ink. It was made from soot from fire, oil, and animal bones. Today this is made with different things.

In the 7th century

People used quill pens. Quill pens were made from the hollow feathers of birds. They worked better than reed pens because they were softer and you could clean them and use them more often.

In the 10th century

The first fountain pen was made. The pen held ink in a reservoir inside it and the ink traveled down to the rib. However, sometimes drops of ink came out of the pen and ruined the paper.

1938

László Bíró invented the ballpoint pen. It had a tiny ball in its tip which rotated as it moved along the paper and picked up ink from a cartridge inside. It worked well because it was clean to use.

1965

The Space Pen was invented. The Space Pen could write underwater, upside down, in extreme temperatures and at zero gravity! Astronauts used them in space.

The Space Pen can do everything. But who knows what pens will be invented in the future!

A biography

We write a biography to talk about the main events of someone's life.

Louis Braille (1809–1852)

Louis Braille was born in France in 1809. In 1812, he had an accident and went blind. When he was ten, he went to a school for blind children.

To begin with, Louis was very unhappy. The school had books with raised letters made with metal, which blind people could feel with their fingers. But it was very difficult to read and there were only 14 books in the school.

Soon after, a man called Charles Barbier visited the school. He showed the boys his invention, called "night writing." It was a code of 12 raised dots. It was also very difficult to read, but it gave Louis an idea!

During the next three years, Louis invented a new code, which only used six raised dots. Today we call it "Braille." It was very simple and easy to use. Later, Louis became a teacher for blind people. He also translated many books into Braille.

Now, Braille is used in almost every language all over the world!

- Look at the photos. What do you know about energy?
- Listen and read.

RENEWABLE ENERGY

Energy provides electricity to our homes. It can come from renewable or non-renewable sources. Non-renewable sources, such as coal and oil, cannot be used again. These kinds of sources are called fossil fuels. They are bad for the environment because they produce pollution. Renewable sources, like the wind and the sun, can be used again and again.

WIND POWER

Have you seen a wind turbine? It's like a huge windmill, but it's built on a tall tower. When the wind blows, the blades turn. This then turns a generator which produces electricity. Modern wind turbines can reach speeds of over 320 kph. When there are lots of wind turbines together, it's called a wind farm. The best places for wind farms are in open areas on mountains and hills, in fields, or on the coast. They can also be built in the ocean.

SOLAR POWER

Solar power comes from the sun. It can be used to heat water and to generate power. Have you seen the big shiny panels people put on the roofs of their homes? These are called solar panels and they are made from silicon. The panels collect solar energy and people use it for heating their water and the air. The largest solar power plant in the world is in California's Mojave Desert. It has over 350,000 mirrors that change the sun's heat into electricity.

Computers – Fun Facts

Who invented the computer?

In 1833, a British inventor, Charles Babbage made plans for a math machine. It was the beginning of the first computer. Babbage spent 37 years trying to build his machine, but there were many complications and he died before he finished it. The first computer was finally created in 1946. It was called The Small-Scale Experimental Machine.

Why is a mouse called a mouse?

The first computer mouse was invented by Douglas Engelbart in around 1964. It was a little wooden box on wheels that could move an on-screen cursor. It was called a mouse because the wire that connected it to the computer looked like a tail. Luckily, a computer mouse is much smaller now and it is usually made of plastic. However, it still looks like the first mouse that was made.

When did the World Wide Web begin?

The World Wide Web (WWW) was invented by Tim Berners-Lee and Robert Cailliau in 1990. It was immediately successful and in four years, 50 million people were using it! It is difficult to imagine life without it as the World Wide Web has changed the world!

How many computers are there in the world today?

In the early 1940s, the president of the computer company IBM said, 'I think there is a world market for about five computers.' However, today there are more than one billion computers in the world! Computers became much more important in the world than anyone ever expected!

How big was the first computer?

The first computer was huge. It filled a large room and weighed the same as six adult male elephants! Luckily, as technology has improved, computers have gotten smaller.

Writing

- 1 Look at the research report. What is it about?
- 2 Read.

First, we write an introduction explaining what the research report is about.

We can write headings for each section of the report.

We can use questions as headings when we want to give the answers in a section of the report.

We can give quotes from people who know a lot about the topic.

We can put facts or figures in the report, but we must check that they are true!

My Research Project by Jen Thomas

For my research project, I wanted to find out how the Internet works. Everyone around the world can access the World Wide Web. But how is this possible?

Internet cables

Computers around the world are connected to the World Wide Web by cables that go to every country and bring them the Internet.

Where are the cables?

The cables need to reach all the countries, but there are huge oceans in-between the countries. So the cables lie on the bottom of the ocean!

Do the cables ever break?

Yes, the cables break pretty often, but the Internet doesn't stop working. The scientist Brad Jennings explains why: "There are lots of cables, so when one cable breaks, it isn't a problem. It's only when they all break at the same time that the Internet stops working."

Why do the cables break?

They can break because of earthquakes, fishing nets, or even shark bites! Normally, a cable breaks every year at some point and needs to be repaired.

3 Read again and answer the questions.

- 1 Where are the Internet cables?
- 2 How often do the Internet cables break?

4 Match.

- 1 Robots
- 2 Every cable has seven layers of plastic to protect it.
- 3 My research report is on how Internet cables are repaired.

Diaries from Delhi

My name's Suzie. I'm eighteen years old and I'm a student from London. Three weeks ago, I was teaching English in a language school in Tokyo. The job ended and I decided to take a holiday. I wanted to travel around the world. I put some clothes in a backpack, found my passport, bought a new pair of trainers, and said goodbye to my friends. I was sad to go, but I was looking forward to my new adventure.

I've always wanted to go to India, so I bought a ticket to Delhi. I caught a taxi to the airport. I remember feeling really nervous. Was I doing the right thing? Should I stay in Tokyo? Or maybe I should go back home to London? I phoned my mum from the airport and she told me not to worry. If I wasn't happy, she said, I could give it up and come home. I sat on the aeroplane feeling a bit happier. I watched a few films and the time passed quickly. I chatted to the people around me and, by the time we arrived, I'd made some new friends. One of them was from Delhi. She gave me the address of a hotel and that's where I spent my first night.

The next day, I explored Old Delhi, which is the traditional part of the city. Chandni Chowk is the main street. It's very busy, full of cars, cycle rickshaws, hand-pulled carts, people and animals. You can find the oldest and busiest markets in India here, selling all kinds of things, including jewellery, material, perfume and, of course, street food. I love *golgappa* which is a kind of bread filled with chickpeas and spicy potatoes. Indian sweets are delicious, too.

One of the most interesting places I've visited in Delhi is Humayun's Tomb. This monument looks a bit like the famous Taj Mahal in Agra, but it's older. The tomb was built in 1570. It's a very beautiful building and is surrounded by beautiful gardens. Another great place to go is the Red Fort, which was built in 1638. You can see a sound and light show in the evening, which is really amazing.

I'm going to spend a few more days in Delhi because I love it so much. Tomorrow, I'm planning to visit the National Museum because I've heard that the art is fantastic. After that, I'll be back on the road! I'll let you know where I decide to go.

Bye for now!

Suzie

I'm Joe and I'm nineteen. I'm from New York, but I've been living in Australia. Two days ago, I was working as a waiter in a restaurant in Sydney. I was having a great time, the weather was amazing and the people were really friendly. It was more like a vacation than a job! Then I decided to give it all up and leave! Why? Because I wanted to see the world! I bought a new backpack, some jeans, T-shirts and a pair of sneakers. I bought a ticket to Delhi, took some money out the bank and said goodbye to my friends. And then I was ready to go. I caught a cab to the airport. I was really excited, but I was nervous, too. I phoned my mom back home in New York and told her my plans. She said I was doing the right thing and I felt better! I fell asleep on the airplane, so I didn't talk to anyone. I didn't even see any of the movies. When I arrived in Delhi, I found a place to stay and

then I slept again. I was very tired!

At last, I was ready to see the city. Wow! Delhi is amazing! It's crowded and noisy, but there's so much to see and do. They've got some great stores. I spent hours shopping around. The food is great, too! I bought some *papdi chaat* in one of the street bazaars. It's a kind of bread with potatoes, chickpeas, yogurt, and chili. Delicious! I found some amazing Indian candy, too. It's so sweet!

I've already been to some of the temples, the tombs, the gardens, and the mosques. Jama Masjid is the largest mosque in India. It's really amazing! It took 13 years to build, and was completed in 1656.

It's opposite Chandni Chowk in Old Delhi. If you climb to the top of the southern tower, you'll get an amazing view of the city.

They have all kinds of festivals here in Delhi and, next week, it's the start of Holi. This is a Hindu festival, but lots of people celebrate. For two days, people light bonfires and throw colorful paint at each other. I don't want to miss that!

Next week, I'll probably leave Delhi. Where will I go? I don't know yet. I think I'll stay in India for a couple of months, though.

I'm loving it here!

Bye!

Joe

Lesson One Story

1 Listen and read. Why do the children decide to go into the cave? 

Fin Today you're all explorers! Ten flags are marked on the map. You have three hours to find them. At the end, the group with the most flags wins!

Fin There is an adult with each group to keep you safe! Here is a compass for each group. Good luck! I'll wait for you here.

Libby Right. Let's try and find this flag first. We just have to walk north. Who has the compass?
Ed I do! It's this way!

Kate We've been walking for a long time. Where's the flag?
Libby Are you sure we're going north, Ed?
Ed North? I thought you said south!

Libby I think this is the river which is on the map. We can find our way now.
Kate Oh no! It's starting to rain.
Tom And it looks like a storm. We need to find shelter.

Ed How about this cave?
Libby Are you sure? It's very dark.

Reading

- 1 Look at the pictures. When do you think each ship sailed? 2 Listen and read.

Famous Shipwrecks

Sailing can be dangerous and many ships and boats have sunk. There are many ships lying at the bottom of oceans all over the world. Studying shipwrecks is important to historians because they contain clues about what life was like in the past.

The *Atocha* was a Spanish ship that **sank** in a terrible **hurricane** in 1622. It was carrying gold, silver, and jewels. People were sent to get the treasure because it was very valuable. However, the ship was lying deep under the ocean. At the time, it was very difficult to dive down so far. Then, in the same year, another hurricane destroyed the shipwreck and the treasure was lost. The treasure stayed beneath the sea for over 360 years. In 1969, a man named Mel Fisher started to **search** for the treasure. This time, divers had better equipment. After 16 years, he found parts of the wreck and most of the treasure. He put the treasure in a museum in Florida, where you can see it now.

The *Titanic* was a passenger ship built in 1911. It was called the "unsinkable ship" because of its amazing design. No one believed it could sink. On April 10th 1912, the *Titanic* left England for New York City on its first **voyage**. Four days later, the ship hit an **iceberg** in the Atlantic Ocean. The ship sank and over 1,000 people **drowned**. For a long time, underwater explorers searched for the shipwreck. In 1985, they discovered it. The wreck was broken and it was impossible to move, but they were able to bring back thousands of items, such as clothes and letters. These items have helped historians understand more about the people who sailed on the *Titanic*.

3 Read again and write *Atocha* or *Titanic*.

- 1 It sank in 1622. _____ *Atocha* _____
 2 It only sailed once. _____
 3 It had lots of treasure inside. _____
 4 It was sailing in the Atlantic. _____
 5 It was built in 1911. _____
 6 It was lost for over 360 years. _____

A personalized text

We can use our imagination to write about something we'd like to do in the future.

We can use lots of different adjectives to make our descriptions more interesting.

Use *such as*, *for example*, *like* and *for instance* to give examples.

When we are imagining what a situation might be like, we use *would*. For facts or things we know are true, we use the simple present.

We finish by giving a final reason for our choice.

Being an Explorer

by Fred Smith

I'd love to be an underwater explorer because I love seeing new places and being in the water. I love seeing amazing things such as colorful fish. I think it would be fantastic to look at the bottom of the ocean.

Underwater explorers do different things. Some explorers are scientists. They do scientific research, for example, looking at underwater volcanoes. They also make maps of different areas. Other underwater explorers are historians. They examine shipwrecks and objects inside them, like treasure and ancient possessions. They learn lots of things about the past, for instance, how people used to live. Some underwater explorers are environmentalists. They look at the environment. They study how animals live beneath the ocean and check for pollution.

I think all of these things would be really interesting to do. That's why I'd love to be an underwater explorer!

1 Listen and read. When was the *Mary Celeste* found? 🎧

The *Mary Celeste* was a mysterious ship. In November 1872, the ship left New York for Italy. The captain, his wife, their daughter, and the ship's crew were on board. In December 1872, a passing ship found the *Mary Celeste* floating in the ocean. After the crew had climbed onto the ship they saw there was no one there! They explored the ship and discovered that someone had taken the lifeboat and a few other things. But the ship wasn't damaged. There hadn't been a storm. What happened to the people? No one knows! It's a mystery!

2 Read and learn.

Past perfect

Use the **past perfect** for one thing that happened in the past before another thing happened in the past. After the crew had climbed onto the ship, they saw there was no one there.

Past perfect = had (not) + past participle
Look! 'd = had

Use the **past perfect** for the earlier thing that happened and the **simple past** for the thing that happened after that. They discovered that somebody had taken the lifeboat.

3 Complete the sentences. Use the simple past or the past perfect. 📖 Irregular verb list Workbook 6 page 136

The Nazca Lines

In this interview, **historian** Michael Jones talks about the mystery of the Nazca Lines. Michael Jones has studied the Nazca lines for many years.

1 _____
 2 _____
 3 _____
 4 _____
 5 _____
 6 _____

The Nazca were an ancient people that lived in Peru, in South America, about 2,000 years ago. The people are well-known for creating the Nazca lines. The Nazca lines are famous all over the world and they can still be seen clearly and easily today.

They are giant sketches which the Nazca people drew in the desert in the Nazca Valley. Some of the drawings are just long, straight lines.

No, they also drew birds, animals, and figures. For example, there's a monkey, a giant condor, which is a type of bird, and a huge spider. There's also a human which has a big, round head and is known as "the astronaut". We don't know why they drew these objects.

The desert in the Nazca Valley is made of dark red stones and soil. Undereath there is a lighter, yellow soil. The Nazca cleared away the top soil to show the lighter color. The area has a very dry climate and there is little wind. Archeologists say this is why the drawings were able to survive.

We can't be sure, but it probably took hundreds of years to make so many drawings and probably hundreds or even thousands of people to make them.

7 _____
 8 _____

The drawings were first discovered in 1927, when a plane was flying across this part of the desert. What is incredible is that because the drawings are so huge, you can only really see them from the air. Today, people travel in small planes and look down on them, but how did the Nazca people see what they were making? It's a mystery!

A tourist information brochure

We write a tourist information brochure to give information about important places to visit in our country.

In a tourist information brochure, we include all the important information:

- when it's open
- how much it costs
- where it is

We explain what the tourist attraction is, and why it is important.

We use *It is thought...* and *Historians think...* to explain the history of a place.

We finish a tourist information brochure by giving an exciting reason why tourists should visit.

Visit Stonehenge!

Opening times

9:30 a.m. – 4:00 p.m. (winter)
9:00 a.m. – 7:00 p.m. (summer)

Prices

£3.20 for children

Where is it?

Salisbury, England

What is Stonehenge?

Stonehenge is a huge and mysterious circle of stones in the south of England. No one is sure who built Stonehenge or why, but it is thought that people began building it around 5,000 years ago. Some historians think that the circle was built for festivals. Other historians think that it is a kind of ancient calendar. This is because of the way the sun falls on different stones at different times of the year.

Why visit?

Stonehenge is an incredible sight. It is amazing because of the size of the stones. The tallest stone is more than six meters high. The stones came from a long way away. People didn't have transportation then so how did they move them? No one really knows! Come and visit and see what you think!

DIGGING UP THE PAST

Archeologists study **remains** to learn about humans at different times in history. These remains can be artifacts such as tools, **ceramics**, coins, pieces of art, and even garbage. They can be **features** such as pyramids, or ruins or buried cities. Archeologists want to know how people lived. They want to know about their homes and their food, where they worked, and what they enjoyed doing. They also want to know what people believed in and how they were **governed**. Archeologists can find out many of these things by going on archeological **digs** all over the world.

Sometimes, archeologists find written records or drawings to help them with their investigations. For example, **hieroglyphics** help them understand how advanced Ancient Egyptian society was. **Prehistoric** cave paintings show the animals that existed then, and how people hunted for food. On other occasions, artifacts and features are the only clues archeologists have. Then it can be difficult to answer questions. Why, for example, did people build giant statues on Easter Island?

In more recent years, archeologists have used modern technology. In 2014, the British Museum took eight Egyptian mummies from their collection to two London hospitals. They scanned the mummies using special x-ray machines called **CT scanners**. Then they used the information to build 3D models of the mummies. The archeologists learned a huge amount about these people from Ancient Egypt, including how they died and what illnesses they suffered from.

Lesson Five

Reading

- 1 Look at the text. What happened to Robinson Crusoe's ship?
- 2 Listen and read. 

Robinson Crusoe

by Daniel Defoe

Robinson Crusoe was sailing to Africa when his ship hit the rocks in a terrible storm. He swam to the shore and discovered he was the only survivor. The next day, he swam out to his shipwreck. It was on the rocks near the island. He brought back tools and other useful supplies. Then he looked for a place to build a shelter.

I walked to the top of the highest hill and looked down. I was very unhappy, because I saw then that I was on an island. There were two smaller islands a few miles away, and after that, only the ocean. Just the ocean, for mile after mile after mile. I was all alone.

After a time, I found a little cave in the side of the hill. In front of it, there was a good place to make a home. I used the ship's sails, rope, and pieces of wood, and after a lot of hard work, I had a very fine tent. The cave at the back of my tent was a good place to keep my food, and so I called it my "kitchen." That night, I went to sleep in my new home.

The next day, I thought about the possible dangers on the island. Were there wild animals on my island? I didn't know, but I was very afraid. So I decided to build a very strong fence. I cut down young trees and put them in the ground, in a half-circle around the front of my tent. I used many of the ship's ropes, too, and in the end my fence was as strong as a stone wall. I felt safer when I'd finished the fence. No one could get over it, through it, or around it.

3 Read again and write the answers.

- 1 Was Crusoe sailing to the U.S.A. at the time? No, he wasn't.
- 2 Was he the only survivor from the ship? _____
- 3 Did he take some tools from the ship? _____
- 4 Did he keep his food in his tent? _____
- 5 Was he worried about wild animals? _____
- 6 Did he make his fence from stones? _____

Writing

- 1 Look at the text. What is it about? 2 Read.

An advice text

We can write to give advice about different things. We can use a concept map to plan a text.

IF YOU FIND YOURSELF ON A DESERT ISLAND, HOW DO YOU SURVIVE?

HERE ARE SOME TIPS!

DRINKING

- You need to find fresh water! Walk along the beach until you find a river. Follow it away from the ocean and you will usually find faster moving water that you can drink.

EATING

- Next, you need to eat. You will find plants around the river. There will also be fish. Make a fishing line, so that you can catch them. You can use thin pieces of wood and thread from your clothes.

SLEEPING

- And what about somewhere to sleep? You will need a shelter. Use rocks, leaves, and parts of a tree to build a small home.

KEEPING WARM

- Make a fire in order to stay warm. You can also use it for cooking and for keeping wild animals away.

GETTING RESCUED

- You will want to be rescued! If you put plants on your fire, they will make a lot of smoke. Someone might see it and come to find you!

Use bullet points to show each piece of advice clearly.

Use headings to make the information easy to find.

Use *in order to* and *so that* to explain why we need to do something.

Use imperatives to give instructions.

Keep sentences short and simple, and avoid unnecessary adjectives.

We Didn't Mean to Go to Sea

What has happened so far ...

Jon, Susan, Roger, and Kitty Walker were staying by a river. They met a young man called Jim Brading, who invited them to go sailing on his sail boat. Their mother agreed, but told them to stay on the river and not to go out to sea. The children sailed to the mouth of the river, but then the wind died. They tried to use the boat engine to get back up the river, but there wasn't any gas! Jim rowed to land to get some more. While he was gone, fog suddenly appeared, and then the children realized they were floating out to sea. They decided they had to wait until morning before they could return to the shore. But, when the fog finally disappeared, the rain started.

At first, the rain was not too heavy, but then the wind quickly became strong and, out of the west behind them, came a white wall of rain, falling down into the sea. It was still too dangerous to think of going back because they couldn't see anything through the rain. So, they went on, and the wind blew them further and further from the land. When it finally stopped raining, the sky in front of them was already growing dark, and the boat was sailing faster and faster through the tall waves.

"Let's turn back now," said Susan. Jon took a deep breath. He wasn't sure that he could find his way back, but he didn't say this to the others. "All right," he said. "I'll turn the boat around now."

The next moment, terrible things began to happen. When you are sailing with the wind behind you, you never really know how hard the wind is blowing. It's very different when you turn and sail against it. As the boat turned into the wind, a wave broke over it and water flooded the boat. Up the boat came again, then down again, and then there was another big wave. The children were soon knee-deep in water. Jon was scared, but he tried to steer the boat against a sea and a wind that were too strong for him.

"Stop! Jon! Stop it!" cried Susan, at last. "We'll have to turn around again! We can't do this!" Susan, almost shaken to pieces by the boat's new violent movement, lay across the side and was terribly sick.

4 **Think!** Discuss.

- 1 Did you enjoy the extract from the story? Why (not)?
- 2 What do you think happens at the end of the story?
- 3 Would you like to go sailing? Why (not)?

Jon slowly steered the boat around. Very slowly, the little boat turned away from the wind and back on her old course with the wind behind them again. From the cabin, they heard Kitty's frightened voice. The boat was full of water and she needed to get it out before they started sinking. Susan found the pump, and began pumping hard to get the water out of the boat.

It began to get dark. The wind was still blowing hard, but the boat sailed on smoothly. Even Susan began to feel better. No one had fallen into the sea, everyone was safe and, soon, the night would end. The sun would rise, the wind would stop and they would sail back to land.

Susan and Kitty didn't feel seasick any more. Jon's arms hurt with steering, but he felt much happier. Roger was hungry and wondered if everyone had forgotten about supper. "Susan," he said. "It's ten o'clock. What about some chocolate or something?" "Ten o'clock?" said Susan in surprise. "It's time you all had something to eat." And, a few minutes later, they were all eating very large pieces of fruit cake and pieces of chocolate. Suddenly, Susan saw lights ahead.

"There's a green light on one side and a red light on the other side." "It's a big ferry, on its way from Holland to England. It's coming this way," said Jon. "Maybe they could take us back home," said Roger. "It's getting nearer and nearer. I can see it very clearly."

"But they can't see us!" shouted Jon suddenly. "We have no lights! And it's coming straight towards us. We have to get out of the way. We have to warn them. Roger, sound the horn!" Jon was very frightened as the boat was coming straight towards them and it was very big. Roger sounded the horn.

Someone on the ferry heard the loud noise of the horn and, at the last minute, the ferry changed course. The green light of the big ship disappeared and it went quickly past their little boat, almost touching its sides. "Show your light, you stupid fishermen," came an angry voice from the ferry. Then the ferry had passed them and was off on its way to England. The waves that the ferry made were very big, and everyone was thrown from side to side and got very wet again. They were still in one piece, although they were sailing further and further away from England.

Reading

- 1 Look at the text. How many people in the world speak Spanish?
- 2 Listen and read.

Languages of the World

Q How many languages are there in the world?

A There are around 7,000 languages spoken in the world. Some of these languages have almost disappeared and only have a few speakers left, but others are still spoken by millions of people! There are many languages which were widely spoken in the past and which no one speaks anymore, for example, Latin or Ancient Greek.

Q What's the most widely spoken language in the world?

A Mandarin is the most widely spoken language in the world. It's the official language of China and about 900 million people living there speak it as their native language. Mandarin is also spoken in other Asian countries such as Singapore, Malaysia, Indonesia, and Thailand. So, altogether, Mandarin is spoken by almost 15% of the world's population!

Q What are the next most widely spoken languages in the world?

A Hindi, English, and Spanish are each spoken by over 300 million native speakers. Portuguese, Russian, Arabic, Japanese, German, and French each have 100–300 million speakers. That's a lot of people!

Q More people speak Chinese than English, so why is English the international language?

A The reason is perhaps because English is spoken on so many different continents. People in the U.S.A., the U.K., Australia, Canada, Ireland, and New Zealand speak English as their first language. It's also recognized as an official language in more than 70 countries around the world!

Q Why do some languages disappear?

A International companies often have businesses in different countries. This is one reason why young people in these countries may learn the more dominant languages of the world and stop learning their own languages.

Q How many languages will there be in the future?

A Some scientists predict that half of the languages spoken in the world today will disappear by the end of the century, as young people stop learning the language of the country they come from.

Dreaming in a Spaceship

I dreamed I was in a spaceship,
Flying through the stars.
I passed a comet on my way,
As I headed off to Mars.

The stars were as bright as diamonds
In the darkness of the night.
The moon shone like a precious pearl.
It was an amazing sight!

My spaceship landed on the moon.
It was wonderful for me!
So I climbed onto the surface
To see what I could see.

I walked around for a while,
But there wasn't much to do.
I found a flag and a rock or two,
And then admired the view.

But I knew there was something real
About my space trip to the skies.
For I found a moon rock in my pocket
And there was stardust in my eyes.

I stared at the scene before me.
It was such a beautiful view.
A satellite spun around and around,
But on and on I flew.

I flew through the rings of Saturn,
I circled the Earth below.
Neptune shone with a dark, blue light
And Venus seemed to glow.

The ground was very bumpy,
There were moon rocks all around.
Everything was very quiet
And I couldn't hear a sound.

The next thing, it was morning.
I was safe and cozy in bed.
I told my mom about my trip.
"What a nice dream," she said.

Yes, he does.

2 Read.

In the Sky

The sky is as dark as black paint.
The moon is as white as snow.
The stars sparkle like silver jewels.
And all the planets glow.

The sky gets lighter quickly.
The sun comes up in the sky.
The birds all sing together.
You can hear a rooster cry.

The sun is as hot as burning fire.
The sky is as blue as the sea.
The clouds are as fluffy as newborn chicks.
And the birds rest in a tree.

The world is as quiet as a sleeping child.
There's a very gentle breeze.
The sun falls slowly from the sky.
And the moon shines on the sea.

A poem

There are lots of ways of making poems sound more beautiful and interesting.

We use similes to make writing more interesting and create strong images in the reader's mind.

A simile is the comparison of two things.

We use *like* ... or *as* ... *as* to compare two things.

We sometimes write different verses. There are four verses in this poem.

We usually start each new line with a capital letter.

We sometimes use rhyming words. In this poem, the rhyming words are in the second and fourth lines of each verse. Avoid forced rhyme – using words that rhyme but don't make sense.

3 Read again and answer the questions.

1 What two sounds can you hear in the morning? 2 Where are the birds in the afternoon?

4 Complete the similes.

a cheetah diamonds fine chocolate ice a tortoise

- The sun is as hot as fire.
- My cold hands feel like _____.
- This train is as slow as _____.
- You run so fast! You're like _____.
- His eyes are as brown as _____.
- The stars look like _____.

Topic: Light

- 1 Look at the photo. What do you think is happening?
- 2 Listen and read.

TRICKS OF THE LIGHT

In ancient times, people made up stories to explain natural phenomena. For example, when the sun disappeared, people in China believed a dragon had eaten it. And in Greece, they thought the gods were angry and had hidden it away. Then scientists became interested in astronomy. They studied the moon, the sun, and the planets. They began to understand the earth's cycle. They learned that when the sun disappeared behind the moon, it was a solar eclipse. They realized it happened when the moon comes between the Earth and the sun. The moon blocks our view of the sun and all we can see is a black circle with a ring of light around it, called the corona.

Rainbows were another mystery. The Norse people thought a rainbow was a bridge between heaven and earth that only the gods could use. In Ireland, they thought that a pot of gold was hidden at the end of a rainbow. Now scientists understand that a rainbow is a trick of the light – it only occurs when the sun is shining and there is rain as well. As sunlight passes through water droplets, it bends in a process called refraction. It then splits into the seven colors of the spectrum that make up rainbows. These colors are red, orange, yellow, green, blue, indigo, and violet.

3 Read again and write True or False.

1 Listen and read. Why is Libby so happy at the end? 🎧 111

Tom This is hard work, isn't it?
Libby Keep going, Tom. We have to keep this dolphin wet.

Tom How much longer can it survive on land?
Libby I don't know. I wish I knew.

Tom Hey! That's Ed and Kate, isn't it?
Libby Yes! And they're with Fin and a rescue team.

Libby Do you think it will survive?
Man Yes, I think so. It's a good thing you found it and knew what to do.

Ed It's gone!
Libby I hope it's all right out there.
Man It'll be fine now. You saved its life. It will be busy finding its family again now.

Kate Look! It's the dolphin! It looks very peaceful in the ocean.

TRAVEL BLOG: My Year Around the World

I'm Sarah, I'm 12 years old and this is my blog! We left Canada in January when Mom and Dad decided they wanted us to give up our lives in Canada, and go traveling for a year! They said they wanted us to learn about lots of different things around the world by seeing them all! It was the start of a big adventure!

On Day 1, we flew to Delhi, in India. What an amazing place! It was so busy and noisy. There were hundreds of rickshaws, motorcycles, and cars driving around and people shouting and rushing everywhere. We spent three days in Delhi and then went by train all the way down the coast to Kerala. The journey took four days!

We stopped in a fantastic town called Varkala. There were a lot of palm trees on the beach, white sand, and great sunshine. We went on an elephant ride! We traveled through the jungle and across rivers. It was so exciting! It was quite scary being so high up on an elephant, but it was still great fun. Unfortunately, my brother Dan hated it because he doesn't like heights!

After Varkala, we spent four days on a house boat traveling down a river. We stopped once at a village and met a local family who invited us to eat with them. The food was traditional food from Kerala. It was spicy and full of different flavors. After that, the local children taught us a traditional Indian board game called Carroms.

We're going to spend a few days more in Kerala and then we're going to Sri Lanka. I'll write an update on my blog again when I arrive there!

Writing

- 1 Look at the opinion essay. What is it about? 2 Read.

An opinion essay

We can write an opinion essay to discuss the advantages and disadvantages of something. We divide the essay into four paragraphs.

Paragraph 1: the introduction (where we introduce the topic)

Paragraph 2: the advantages (where we explain the good things about the topic)

Paragraph 3: the disadvantages (where we explain the bad things about the topic)

Paragraph 4: the conclusion (where we make our final decision about our opinion)

Tourism

Every year, millions of people travel around the world to visit the islands in the Caribbean Sea. But is it a good thing?

There are some very good things about tourism in the Caribbean islands. First, it is good for people to see the culture and history of other places. Second, tourists spend money in hotels, restaurants, and stores. This is good for local people. Thirdly, tourism often means that better roads and airports are built, which is also good for local people.

However, not everything about tourism in the Caribbean islands is good. First, tourists can make peaceful places busy and noisy because there are more people, cars, and planes than before. Second, tourism can destroy wildlife because hotels are sometimes built on their natural habitat. Finally, many foreign businesses own the hotels, stores, and restaurants. So, sometimes, big companies get all the money, not the local people.

It seems to me that although tourism can be good for islands in the Caribbean, it can have bad sides, too. In my opinion, it's always important for tourists to respect the local culture.

The Mysteries of Mars

People have always been fascinated by Mars, and it has become one of the most explored planets in the Solar System. In the early 1600s, when the telescope was invented, astronomers looked up at the planet and wondered what it was like. Since then, as technology has advanced, scientists have sent satellites to orbit Mars and robots to explore the surface. Over the centuries, they have discovered many things.

The Climate

Mars is known as the "Red Planet" because it is covered in red dust. It has violent dust storms, so the surface is always changing. It is the second-smallest planet in the Solar System and fourth in line from the sun, which means it can get very cold. The highest temperature on Mars is about 25°C, but the lowest is around -120°C.

The Discovery of Water

Mars is in the middle of an ice age, so liquid water cannot exist on its surface at the present time. However, photographs show markings on the surface of the rocks. Scientists think these markings suggest there were rivers there. Perhaps this was because of melting ice, or perhaps there was rain and snow. Some scientists even believe a large ocean once covered the northern half of Mars.

The Surface

Mars has an interesting surface. Scientists think meteorites crashed onto Mars billions of years ago because it has many large craters. The largest crater is about 1600 km across. There are also mountains,

valleys, and volcanoes. Olympus Mons is one of these volcanoes and is the highest mountain in the Solar System. It's around 21 km high, which is about three times higher than Mount Everest.

3 Read again and answer the questions.

- 1 Why is Mars called the "Red Planet"?
- 2 What is Olympus Mons?
- 3 What was the name of the first spacecraft to land on Mars?
- 4 When did Curiosity land on Mars?

4 Think! Discuss.

- 1 Do you think space exploration is a good idea? Why (not)?
- 2 Do you think humans will ever land on Mars? Why (not)?

The Early Missions

The first missions to Mars began in the 1960s, when the Soviet Union and the U.S.A. began sending spacecraft to orbit the planet. These spacecraft took photographs and collected information about many things. Some of them tried to land on the surface, but these attempts were unsuccessful.

Then, in July 1976, the first unmanned spacecraft landed on Mars. It was called Viking 1. In September, its twin, Viking 2, landed on a different part of the planet. These two spacecraft had computers that could record information around them and send it back to earth. However, the spacecraft could only stay in one place. So scientists weren't able to know what the whole planet was like.

In 1996, the Sojourner was launched. This craft was different from Viking 1 and 2 because it could move around like a remote-controlled car. It was known as a

rover because it could travel across the surface without a human driver and explore other areas. In 2004, two more rovers were launched and landed on Mars. These rovers were called Spirit and Opportunity. Unfortunately, Spirit has since become trapped and has stopped working, but Opportunity is still active. It continues to move, collect information, take photos, and report back to earth.

The Landing of Curiosity

More recently, in 2012, NASA sent a new rover called Curiosity to Mars. This rover, which is the size of a car, has six wheels and is around 2.5 meters long. It can travel 200 meters per day. It has computerized equipment which can survey rocks, soil, and dust. It has cameras that can send images back to earth. It is the biggest and most advanced rover yet. Its mission is to find out more about the climate and geology of Mars, and also to find out if there was once some kind of life there.

The Future of Space Travel

Scientists have discovered a lot about Mars through satellites and different kinds of robots. However, they are working hard to improve technology. They hope that, one day, they will be able to send astronauts to walk upon the surface of the "Red Planet," so that they can learn more about the mysteries of Mars.

Scientists also hope to develop ways to increase the number of people that can travel into space. It's already possible to pay thousands of dollars to book a place on a spacecraft and travel with astronauts. But, as more and more people are becoming interested, companies such as Virgin Galactic are planning to provide a space tourism service. Virgin Galactic is building a fleet of commercial spaceships, with the intention of making space travel a reality. And, as the demand increases, the price of tickets will become lower. Then, traveling in space, or even exploring other planets such as Mars, may become a reality for ordinary people.
